INDEX TO FAMILIES AND GENERA 1111

INTRODUCTION

With 19 581 indigenous species (infraspecific taxa excluded), 2 267 genera and 349 families of vascular plants, South Africa has the richest temperate flora in the world. It certainly contains the bulk of the taxa counted for the *Flora of southern Africa* (*FSA*) region (Botswana, Lesotho, Namibia, South Africa and Swaziland) given as 21 817 (indigenous and naturalised species) in the recent *Plants of southern Africa: an annotated checklist* (Germishuizen & Meyer 2003), or the *Big Black Book* as it is popularly called. An estimated minimum of 11 700 (60%) of these species are endemic to South Africa (Table 1), most of them (approximately 6 200) occurring in the Cape Floristic Kingdom (CFK), which closely approximates the Fynbos Biome. Some 863 introduced alien plant species, belonging to 441 genera and 106 families, have become naturalised in South Africa. Many of them are invasive and threaten the natural flora and vegetation of South Africa, contributing to the establishment of the emerging ecosystem concept (Milton 2003).

TABLE 1.—Comparison of different categories of plant taxa occurring in South Africa (SA) and the *Flora of southern Africa (FSA)* region, based on PRECIS data as in November 2005

	SA	FSA
Total number of taxa	22 604	24 393
Total number of species	20 491	22 106
Total number of indigenous species	19 581	21 153
Total number of endemic species	11 700#	13 100#
Total number of species of naturalised aliens	915	959
Total number of species of invasive aliens	198*	*
Total number of cultivated species	347	5 580

estimated number
* declared weeds; not known for the *FSA* region.

Inventorying the South African flora

Catalogues of families and genera

One of the first efforts to catalogue the higher order plant taxa of South Africa was Harvey's (1868) *The genera of South African plants* within which he listed 1 186 genera. Following this was the first edition of Phillips's (1926a) *The genera of South African flowering plants*. In this first edition, Phillips listed 1 645 genera, a number that has increased with an additional 142 by the time the second edition of this publication was published in 1951. The most recent attempt at listing and describing the genera (and families) of South African plants is Leistner's (2000) *Seed plants of southern Africa: families and genera* in which 227 families and 2 182 genera are listed and described for the *FSA* region.

Floras and other serial publications

The *Flora capensis* (*FC*) has been published in a series starting in 1860 and ending in 1931. About 25 years later, in the late 1950s, work on the publication *Flora of southern Africa* commenced, with the first volume appearing in 1963. The *FSA* is published by the South African National Biodiversity Institute (SANBI) and aims to describe the entire southern African flora. However, the *FSA* region is currently deemphasised (Smith & Leistner 1994), with mostly short articles appearing in *Bothalia* (another serial publication of SANBI) as *Notes on African plants*.

The *Flowering Plants of Africa* (1921–) is also published by SANBI and is renowned for the botanical art that can be found within its pages. It is modelled after the former *Curtis's Botanical Magazine*, and has published well over 2 000 colour plates of African plants. Its objectives are to convey to the reader the beauty and variety of form of the African flora, to stimulate an interest in the study, conservation and cultivation of African plants, and to advance the science of botany as well as botanical art.

Between 1913 and 1932, Marloth's *The flora of South Africa* was published in four volumes. Volume 1 was dedicated to the Thallophyta, Bryophyta, Pteridophyta, Gymnospermae and Dicotyledones (part 1). The second, third and fourth volumes dealt with Dicotyledones (part 2), Dicotyledones (part 3) and Monocotyledones respectively.

Checklists produced from electronic databases

PRECIS

The National Herbarium, Pretoria (**PRE**) **C**omputerised **I**nformation **S**ystem (PRECIS) is a mega-database that has been in development since the 1970s. It consists of a number of components, two of which respectively house the specimen records and the taxon names. In the specimen database, information such as family name, genus name, specific epithet, type status, identification level (degree of certainty of identification), temporary name, name of the person who identified the specimen, name of the collector(s) with collection number and collection date can be recorded. Additional information (such as the region and country where collected, a quarter-degree grid reference or an exact location—GPS reading) is also recorded for each specimen. Habitat information (such as soil type, substrate, moisture regime, vegetation and biotic effects) and phenological information (such as presence of flowers, fruit, and seed, flower colour, growth form and height of plant) may also be recorded. A 'notes' field allows for the recording of any additional information on the morphology, ecology, occurrence, common name, usefulness, toxicity, reproductive biology, horticulture, aroma and weed or invader status of the plant. Finally it can be recorded whether or not the specimen serves as a voucher for any particular study. From the 'plant name' or taxon database, one can obtain information on specific taxa, including synonyms, distribution within southern Africa and uses (for example medicinal, food). Currently only approved users have access to PRECIS, but the intention is for it to be available for anyone to use freely.

From Smith *et al.* 2003

The first checklist of southern African plants that was published from PRECIS was the *List of species of southern African plants* (Gibbs Russell *et al.* 1984). This was a basic list of plant names in current use. A second edition in two parts included synonyms and references to recent literature. Part 1 (Gibbs Russell *et al.* 1985) covered bryophytes, pteridophytes, gymnosperms and monocotyledons, while Part 2 (Gibbs Russell *et al.* 1987) covered the dicotyledons.

In Arnold & De Wet's *Plants of southern Africa—names and distribution* published in 1993 regional distribution data were added to the names list. This publication listed 353 families, 2 604 genera and 22 211 species of plants for the *FSA* region. A standard work for a decade, the *Black Book* as it was popularly called, has since been replaced by Germishuizen & Meyer (2003), which has been published as part of SANBI's *Strelitzia* series.

Germishuizen & Meyer (2003) lists 369 families, 2 639 genera, and 21 817 species of plants for the *FSA* region. When comparing these numbers with those listed in the earlier Arnold & De Wet (1993), it is clear that better knowledge of the flora of the *FSA* region resulted in an increase in the known diversity of families and genera, while the number of species has decreased, as taxa that were previously thought to be separate species were now classified together. Germishuizen & Meyer (2003) differs from Arnold & De Wet (1993) in that it has been expanded to include data on life cycle, life form, height of plant and altitude. Literature references, synonyms and regional distribution have also been updated.

Since the publication of Germishuizen & Meyer (2003) in October 2003, 99 names (representing infraspecific taxa, species, genera and one family) have been added to the list of taxa known to occur within South Africa. However, 40 names have been removed and 10 have been changed. These changes have been included in this checklist and can be summarised as follows:

	Number of new names	Number of name changes (names sunk)
Bryophytes	30	24
Pteridophytes	5	2
Gymnosperms	0	0
Dicotyledons	167	185
Monocotyledons	209	137

Classifying the flora and vegetation of South Africa

Takhtajan (1986) classified the world into six floristic kingdoms and several floristic regions. South Africa falls within two of these kingdoms, the Cape Floristic Kingdom (CFK) and the Palaeotropic Floristic Kingdom (PFK). The CFK is the smallest (in terms of land surface area) of the six kingdoms and the only one to fall entirely within the borders of one country. The significance of this becomes clear when it is considered that the classification of these kingdoms was based on the number of unique (endemic) plant families and genera contained within a more or less continuous tract of land surface (keeping in mind that the break-up of the continents has isolated related floras from one another). This means that there are at least as many plant families and genera endemic to the very small CFK as there are to almost the whole of the land surface north of the Tropic of Cancer. Indeed the Holarctic Floristic Kingdom covers almost all of North America (excluding Mexico) and Eurasia (excluding India and Indochina) as well as North Africa (mainly the Sahara region) and the Arabian Peninsula—a huge area when compared with the area covered by the CFK. The bulk of the CFK falls within the Western Cape Province of South Africa.

The PFK covers most of the Eastern Cape and Northern Cape Provinces, and all of KwaZulu-Natal, the Free State, North-West Province, Gauteng, Mpumalanga and Limpopo Province. It is the second largest of the six floristic kingdoms and covers most of Africa south of the Tropic of Cancer and north of the CFK as well as Madagascar, St Helena and Ascension and other oceanic islands associated with the African continent, also India, Indochina, and the Malesian, Fijian, Polynesian and Hawaiian island groups. In South Africa, the PFK is represented by the Sudano-Zambezian, Karoo-Namib and Uzambara-Zululand Floristic Regions.

White (1983) divided Africa into 18 phytogeographical regions or phytochoria. Four of these enter into, and one falls entirely within the borders of South Africa. White classified these phytochoria as Regional Centres of Endemism, Archipelago-like Centres of Endemism or Regional Transition Zones and Mosaics. The Cape Regional Centre of Endemism falls entirely within the borders of South Africa and include mainly the Fynbos and Renosterveld vegetation of the CFK. The Karoo-Namib Regional Centre of Endemism extends from southern Angola through western Namibia into southwestern South Africa where it includes the Succulent Karoo and parts of the Nama-Karoo Biomes of South Africa. The Kalahari-Highveld Regional Transition Zone also extends from southern Angola, but covers eastern Namibia and western Botswana (the Kalahari) and the central parts of South Africa where it includes parts of the Nama-Karoo, Savanna and Grassland Biomes. The Maputaland-Pondoland (originally called Tongaland-Pondoland) Regional Mosaic extends from extreme southern Mozambique, along the east coast below the escarpment, into the Eastern Cape Province. True to its name, it contains a mosaic of forest, thicket and grassland vegetation types. Lastly, the Afromontane & Afroalpine Archipelago-like Centre of Endemism extends, in South Africa, from the Soutpansberg in the Limpopo Province along the Mpumalanga escarpment southwards along the Drakensberg Mountains into the Eastern Cape Province. It also occurs in isolated patches associated with high mountainous areas further north in Africa. It includes mainly Afromontane grasslands and forests.

Recently Steenkamp *et al.* (2005), attempted a numerical classification of the flora of southern Africa (*FSA* region) based on distribution records of vascular plant genera endemic to the region. In this classification they divided the flora of the *FSA* region into four larger phytochoria, three of which are represented in South Africa. They were called the Greater Cape, which includes the Succulent Karoo, Fynbos and Nama-Karoo in the southwestern parts of the country; the Greater Afromontane, which includes the Afromontane-Afroalpine and Maputaland-Pondoland phytochoria of White as well as the Highveld grassland; and the Kalahari, which is centred mostly in Botswana and the western parts of Namibia, but which also enters into the Northern Cape and North-West Province and extends in patches north and northeast of the Soutpansberg. The fourth phytochorion, the Kaokoveld, is confined to northwestern Namibia. This classification seems to refute some previous nonnumerical classifications of the flora of southern Africa. For example, the Kalahari splits off early in the hierarchy and is totally separate from the Highveld, which rather associates with the Afromontane vegetation in the northern and eastern parts of the country. This differs from the classification of White (1983) that places the two together as the Kalahari-Highveld Regional Transition Zone.

Rutherford & Westfall (1986) classified the vegetation of southern Africa into seven biomes, namely Fynbos, Succulent Karoo, Nama-Karoo, Savanna, Grassland, Desert (not represented in South Africa), and Forest. Another biome, Thicket, has since been added as a distinct biome (Low & Rebelo 1996). The bi-

omes have been classified based on life forms and climatic conditions. The Savanna Biome is characterised by distinct grass and tree layers, while the Grassland consists of grasses, geophytes and low-growing herbaceous plants. The Nama-Karoo is a low shrubland and the Succulent Karoo consists of low-growing succulents and geophytes. Thicket is a tall, dense shrubland, while Forest is characterised by a tall tree layer with epiphytes and lianas. Fynbos is characterised by its many taxa with fine sclerophyllous leaves.

Acocks (1953) classified the vegetation of South Africa into veld types (units of vegetation whose range of variation is small enough to permit the whole of it to have the same farming potential) on the basis of agronomic potential. He identified 70 veld types along with 75 variations, including seven coastal tropical forest types, two inland tropical forest types, 11 tropical bush and savanna types, two false bushveld types, 12 karoo and karroid types, nine false karoo types, four temperate and transitional forest and scrub types, 13 pure grassland types, eight false grassland types, one sclerophyllous bush type and one false sclerophyllous bush type. Acocks's classification remained a benchmark work for land use planning for several decades and has since been complemented by Low & Rebelo's (1996) *Vegetation of South Africa, Swaziland and Lesotho*. They identified 68 vegetation types, including 25 types of Savanna, 14 types of Grassland, six types of Nama-Karoo, four types of Succulent Karoo, five types of Thicket, three types of Forest and ten types of Fynbos and Renosterveld.

Current efforts to classify the flora and vegetation of South Africa include the Vegmap Project led by the South African National Biodiversity Institute, which aims to produce, using GIS technology, the most comprehensive map of the vegetation types of South Africa, Lesotho and Swaziland to date. The Project, which involved over 30 institutions and individuals are nearing its completion, and used existing data, both computerised and noncomputerised, together with field checks, to produce an electronic map showing approximately 400 vegetation types, each with its biome and natural bioregion affinity (Rutherford *et al.* 2004). These authors now recognise nine biomes for South Africa, including Desert, Succulent Karoo, Nama-Karoo, Fynbos, Grassland, Savanna, Albany Thicket, Subtropical Coastal Forest, and Afrotemperate Forest. They also include the subantarctic tundra vegetation types found on the Prince Edward Islands and an additional category dealing with the range of azonal vegetation types present in South Africa (Rutherford *et al.* 2004). A hard copy of the map and a book describing and illustrating the vegetation units are also planned through SANBI's *Strelitzia* series.

Hotspots, and centres and regions of endemism

Three global hotspots of diversity are currently recognised within South Africa—the Cape Floristic Region (called Province in the original publication), the Succulent Karoo and the Maputaland-Pondoland-Albany hotspots (Mittermeier *et al.* 1999; Steenkamp *et al.* 2004) (Table 2). The Cape Floristic Region (CFR) and Succulent Karoo hotspots have both been recognised since 1999, while the Maputaland-Pondoland-Albany was declared with the publication of the new and revised version of Conservation International's *Hotspots revisited* (Mittermeier *et al.* 2004). The CFR hotspot corresponds broadly to the Fynbos Biome, but also includes the Afromontane forests at Tsitsikamma. The Succulent Karoo hotspot is basically the Succulent Karoo Biome in South Africa (but extends into southern Namibia), while the Maputaland-Pondoland-Albany hotspot covers a mosaic of vegetation and biome types along the east coast of South Africa below altitudes of 1 800 m, including parts of Swaziland and southern Mozambique.

TABLE 2.—Some statistics on the flora included in three of the four hotspots occurring within or entering into South Africa

	Cape Floristic Region		Succulent Karoo		Maputaland-Pondoland-Albany	
	Total	Endemic	Total	Endemic	Total	Endemic
Plant species	8 200	5 682	4 849	1 940	8 100	1 900
Plant genera	988	193	730	67	1 524	39
Plant families	150	6			243	1

Van Wyk & Smith (2001) described 18 Centres of Plant Endemism, eight of which fall into one of three larger Regions of Plant Endemism for southern Africa. Fourteen of these Centres lie entirely within, or enter into, South Africa. The three Regions of Plant Endemism are the Cape Floristic Region (CFR), the Maputaland-Pondoland Region (MPR) and the Succulent Karoo Region (SKR). The CFR is equivalent to the CFR hotspot discussed above. An outlier of Cape flora is the Kamiesberg Centre of Plant Endemism that lies further north in the Northern Cape, surrounded by Succulent Karoo. Within the larger SKR, five distinct Centres of Endemism are recognised. These are the Gariep Centre lying on the border between the Northern Cape and Namibia, and extending into both of these political entities; the Knersvlakte Centre in the northern parts of the Western Cape; the Hantam-Roggeveld Centre in the southern parts of the Northern Cape; and the Little Karoo and Worcester-Robertson Karoo Centres that occur as enclaves within the CFR. The Maputaland and Pondoland Centres of Endemism lie within the larger MPR, the Maputaland Centre entering into southern Mozambique and Swaziland, and the Pondoland Centre at the coast on the border between KwaZulu-Natal and the Eastern Cape.

The other recognised Centres of Plant Endemism in South Africa (not included in any specific larger Region of Plant Endemism) are the Albany Centre, a very diverse area in the Eastern Cape; the Drakensberg Alpine Centre, which centres mostly within Lesotho but also extends into the Eastern Cape and KwaZulu-Natal; the Barberton Centre in Mpumalanga on the border with Swaziland; the Wolkberg and Sekhukhuneland Centres crossing over the border between Mpumalanga and Limpopo Province; and the Soutpansberg Centre in Limpopo Province. Schmidt *et al.* (2002) recognise a fifteenth Centre of Endemism lying between the southern parts of the Sekhukhuneland and Wolkberg Centres, which they call the Lydenburg Centre of Endemism. Van Wyk & Smith (2001) also indicate several other possible Centres of Endemism, which are currently not formally recognised since they are floristically poorly known. These include the Namaqualand Rocky Hills, the Tanqua Karoo, the Laingsburg-Witteberge-Elandsberg, the Steytlerville Karoo, Mount Ngeli, the Tugela River Valley, the Wakkerstroom area, the Nkandla Forest, the Waterberg Mountains and the Middle Limpopo River Valley Centres. Table 3, adapted from Van Wyk & Smith (2001), gives some statistics on the various Centres and Regions of Endemism that they recognise.

TABLE 3.—Some statistics on the Regions and Centres of Endemism currently recognised in South Africa

	Total spp./ infra-specific taxa (± number)	Endemics/Near-endemics			
		Species/ infra-specific taxa (± number)	Percentage endemism (of total flora)	Genera (number)	Families (number)
1. Cape Floristic Region	8 000	5 600	70.0%	210	8
1.1 Kamiesberg Centre	1 000	80	8.0%	1	—
2. Succulent Karoo Region	5 000	2 000	40.0%	100	—
2.1 Gariep Centre	2 700	*560	20.7%	*28	—
2.2 Knersvlakte Centre	1 000	*150	15.0%	*8	—
2.3 Little Karoo Centre	2 000	*250	12.5%	*15	—
2.4 Worcester-Robertson Karoo Centre	1 500	*115	7.7%	*3	—
2.5 Hantam-Roggeveld Centre	2 500	*250	10.0%	*5	—
3. Maputaland-Pondoland Region	7 000	1 800	25.7%	60	1
3.1 Maputaland Centre	2 500	*230	9.2%	*3	—
3.2 Pondoland Centre	1 800	*120	6.7%	*6	*1
4. Albany Centre	4 000	600	15.0%	10	—
5. Drakensberg Alpine Centre	2 200	400	18.2%	4	—
6. Barberton Centre	1 500	80	5.3%	—	—
7. Wolkberg Centre	2 500	130	5.2%	—	—
8. Sekhukhuneland Centre	2 200	100	4.5%	2	—
9. Soutpansberg Centre	3 000	45	1.5%	1	—

* Incorporated in the figures for the respective regions.

Threatened plants and Red Data Lists

Red Data Lists (RDLs) are intended to be comprehensive accounts of the global, regional and national conservation status of plants and animals (Hilton-Taylor 2002). The IUCN has, on at least two occasions, published systems of Categories and Criteria to use when assessing the conservation status of species (IUCN 1994, 2001). These systems are based on criteria such as rate of population decline, size of distribution range, changes in the extent of the distribution range, population size and probability of extinction.

The first RDL that covered the South African flora, was published by Hall *et al.* (1980). This milestone publication provided RDL accounts for Botswana, Lesotho, South Africa, Swaziland and the former South West Africa (Namibia) (Golding 2002). Other RDL accounts of the South African flora include Hall & Ashton (1983), Hall & Veldhuis (1985) and Fourie (1986). Hilton-Taylor (1996a) published another very important RDL that was taxonomically more rigorous compared to other accounts. The work by Hilton-Taylor not only covered the flora of South Africa, but also included fairly high numbers of threatened taxa for Botswana, Lesotho, Namibia and Swaziland. It was subsequently updated in *Bothalia* (Hilton-Taylor 1996b, 1997). Scott-Shaw (1999) produced an RDL for KwaZulu-Natal, Lesotho and surrounding areas. The most recent RDL publication was the compilation by Victor and colleagues in Golding (2002) which was produced under the auspices of SABONET and which included RDLs for the ten countries participating in the SABONET Project, namely Angola, Botswana, Lesotho, Malawi, Mozambique, Namibia, South Africa, Swaziland, Zambia and Zimbabwe.

The IUCN/Species Survival Commission recommends that the conservation status of all species should be determined, regardless of whether or not they are suspected of meriting RDL status, to provide a standard against which future assessments can by measured (Hilton-Taylor 2000). Despite all of these publications that deal with the conservation status of South African plants, the RDL for South Africa is still incomplete and most of the flora has not yet been assessed. The Threatened Species Programme of the Directorate of Biodiversity Policy and Planning of the South African National Biodiversity Institute is currently assessing the conservation status of the entire South African flora using the IUCN 2001 system of categories and criteria. Publication of the RDL that will result from this exercise is planned for mid-2006.

About this book

This book has been compiled from Germishuizen & Meyer (2003) and follows the same arrangement and circumscription of families, genera, species and infraspecific taxa. Family, genus and species names are given in alphabetical sequence. Current names are in **bold**. Synonyms are in *italics*. Families are grouped into seven more or less natural assemblages: Bryophyta, Hepatophyta, Anthocerotophyta, Pteridophyta, Gymnosperms, Dicotyledons and Monocotyledons. As in Germishuizen & Meyer (2003), the classification of the gymnosperms, dicotyledons and monocotyledons follows mainly Leistner (2000). Author citations are according to Brummitt & Powell (1992). Abbreviation of the names of countries and South African provinces follows Germishuizen & Meyer (2003).

BRYOPHYTA

AMBLYSTEGIACEAE
Compiled by J. van Rooy

CRATONEURON (Sull.) Spruce 9774200
(1) Van Rooy. 1993. In Arnold & De Wet, *Memoirs of the Botanical Survey of South Africa* No. 62: 42.
(2) Ochyra. 1994. *Fragmenta Floristica et Geobotanica* 39: 137–146.
(3) Vanderpoorten *et al.* 2002. *Taxon* 51: 115–122.

filicinum (Hedw.) Spruce
Perennial. Bryophyte, hydrophyte. Length up to 100 mm. Alt ± 2125 m. KZN

DREPANOCLADUS (Müll.Hal.) G.Roth 9774300
(1) Ochyra & Pócs. 1992. *Fragmenta Floristica et Geobotanica* 37: 379–388.
(2) Van Rooy. 1993. In Arnold & De Wet, *Memoirs of the Botanical Survey of South Africa* No. 62: 42.
(3) O'Shea. 1995. *Tropical Bryology* 10: 120.
(4) Hedenäs. 1997. *The Bryologist* 100: 81, 82.
(5) Hodgetts *et al.* 1999. *Journal of Bryology* 21: 149.
(6) Vanderpoorten *et al.* 2002. *Taxon* 51: 115–122.

hallii Broth. & Dixon
Perennial. Bryophyte, hydrophyte. Length up to 100 mm. Alt? WC

polygamus (Schimp.) Hedenäs
Perennial. Bryophyte, hydrophyte. Length up to 100 mm. Alt? KZN

sparsus Müll.Hal.
Perennial. Bryophyte, hydrophyte. Length up to 100 mm. Alt? FS, KZN, L, EC

HYGROAMBLYSTEGIUM Loeske 9774400
(1) Sim. 1926. *The bryophyta of South Africa*: 413.
(2) Van Rooy. 1993. In Arnold & De Wet, *Memoirs of the Botanical* Survey of South Africa No. 62: 42.
(3) Vanderpoorten *et al.* 2002. *Taxon* 51: 115–122.
Note: taxonomic position uncertain (3).

caudicaule (Müll.Hal.) Broth.
Perennial. Bryophyte, hydrophyte. Length 100–150 mm. Alt 61–2700 m. KZN, WC

LEPTODICTYUM (Schimp.) Warnst. 9774500
(1) Sim. 1926. *The bryophyta of South Africa*: 414.
(2) Van Rooy. 1993. In Arnold & De Wet, *Memoirs of the Botanical Survey of South Africa* No. 62: 42.
(3) Vanderpoorten *et al.* 2002. *Taxon* 51: 115–122.

riparium (Hedw.) Warnst.
Perennial. Bryophyte, hydrophyte. Length 25–50 mm. Alt 15–2100 m. B, M, FS, KZN

SANIONIA Loeske 9774700
(1) Van Rooy. 1993. In Arnold & De Wet, *Memoirs of the Botanical Survey of South Africa* No. 62: 43.
(2) Vanderpoorten *et al.* 2002. *Taxon* 51: 115–122.
Note: taxonomic position uncertain (2).

uncinata (Hedw.) Loeske
Perennial. Bryophyte, hydrophyte. Length up to 200 mm. Alt? FS

VITTIA Ochyra 9774900
(1) Van Rooy. 1993. In Arnold & De Wet, *Memoirs of the Botanical Survey of South Africa* No. 62: 43.
(2) Vanderpoorten *et al.* 2002. *Taxon* 51: 115–122.
Note: taxonomic position uncertain (2).

pachyloma (Mont.) Ochyra
Perennial. Bryophyte. hydrophyte. Length up to 100 mm. Alt 914–1300 m. LIM, KZN, EC

ANDREAEACEAE
Compiled by J. van Rooy

ANDREAEA Hedw. 9734800
(1) Magill. 1981. *FSA* Bryophyta 1,1: 33–37.
(2) Van Rooy. 1993. In Arnold & De Wet, *Memoirs of the Botanical Survey of South Africa* No. 62: 17.
(3) Hodgetts *et al.* 1999. *Journal of Bryology* 21: 133–155.

acutifolia Hook.f. & Wilson
Perennial. Bryophyte. Ht? Alt 2900–3200 m. KZN, L

alpina Hedw.
Perennial. Bryophyte. Ht? Alt ± 2900 m. KZN, L

bistratosa Magill
Perennial. Bryophyte. Ht 5–20 mm. Alt ± 1375–1525 m. WC

nitida Hook.f. & Wilson
Perennial. Bryophyte. Ht 20–120 mm. Alt ± 1525–1675 m. WC

rupestris Hedw.
Perennial. Bryophyte. Ht 5–20 mm. Alt 1525–3240 m. FS, KZN, L, WC, EC

subulata Harv.
Perennial. Bryophyte. Ht 10–20 mm. Alt ± 925–1825 m. WC

ANOMODONTACEAE
Compiled by J. van Rooy

ANOMODON Hook. & Taylor 9762200
(1) Granzow-de la Cerda. 1997. *Contributions of the University of Michigan Herbarium* 21: 243–245.

pseudotristis (Müll.Hal.) Kindb.
Haplohymenium pseudotriste (Müll.Hal.) Broth. (1)
Perennial. Bryophyte. Length 5–15 mm. Alt 20–1700 m. G, M, S, KZN, WC, EC

HAPLOHYMENIUM Schwägr. 9772700
pseudotriste (Müll.Hal.) Broth. = **Anomodon pseudotristis**

HERPETINEURON (Müll.Hal.) Cardot 9772740
(1) Van Rooy. 1993. In Arnold & De Wet, *Memoirs of the Botanical* Survey of South Africa No. 62: 42.
(2) Granzow-de la Cerda. 1997. *Contributions of the University of Michigan Herbarium* 21: 262–264.

toccoae (Sull. & Lesq.) Cardot
Perennial. Bryophyte. Length 20–40 mm. Alt 914–1300 m. M, KZN

ARCHIDIACEAE
Compiled by J. van Rooy

ARCHIDIUM Brid. 9736100
(1) Magill. 1981. *FSA* Bryophyta 1,1: 71–81.
(2) Van Rooy. 1993. In Arnold & De Wet, *Memoirs of the Botanical Survey of South Africa* No. 62: 19.

acanthophyllum Snider
Perennial. Bryophyte. Ht 3–8 mm. Alt 354–1075 m. LIM, G, M, S, KZN

amplexicaule Müll.Hal.
Perennial. Bryophyte. Ht 2–10 mm. Alt? WC

andersonianum Snider
Perennial. Bryophyte Ht 2–6 mm. Alt? WC

capense Hornsch.
Perennial. Bryophyte. Ht 1–4 mm. Alt 600–3200 m. FS, L, WC

julicaule Müll.Hal.
Perennial. Bryophyte. Ht 2–7 mm. Alt up to 2860 m. L, WC

microthecium Dixon & P.de la Varde
Perennial. Bryophyte. Ht 1–5 mm. Alt 420–1500 m. N, LIM, KZN

E **muellerianum** Snider
Perennial. Bryophyte. Ht 3–5 mm. Alt? WC

ohioense Schimp. ex Müll.Hal.
Perennial. Bryophyte. Ht 2–15 mm. Alt up to 2860 m. N, LIM, G, M, S, FS, KZN, L, WC, EC

rehmannii Mitt.
Perennial. Bryophyte. Ht 2–10 mm. Alt ± 750 m. WC

E **subulatum** Müll.Hal.
Perennial. Bryophyte. Ht 4–15 mm. Alt? WC

BARTRAMIACEAE
Compiled by J. van Rooy

AEROBRYOPSIS M.Fleisch. 9765300
(1) Van Rooy. 1993. In Arnold & De Wet, *Memoirs of the Botanical Survey of South Africa* No. 62: 39.
(2) Magill & Van Rooy. 1998. *FSA* Bryophyta 1,3: 579–581.

capensis (Müll.Hal.) M.Fleisch.
Perennial. Bryophyte, epiphyte. Length up to 200 mm. Alt 50–1800 m. LIM, M, KZN, NC, WC, EC

FLORIBUNDARIA M.Fleisch. 9765400
(1) Van Rooy. 1993. In Arnold & De Wet, *Memoirs of the Botanical Survey of South Africa* No. 62: 39.
(2) Magill & Van Rooy. 1998. *FSA* Bryophyta 1,3: 583, 584.

floribunda (Dozy & Molk.) M.Fleisch.
Perennial. Bryophyte, occ. epiphyte. Length 10–40 mm. Alt 950–2150 m. LIM, M, KZN

PAPILLARIA (Müll.Hal.) Lorentz 9765500
(1) Van Rooy. 1993. In Arnold & De Wet, *Memoirs of the Botanical Survey of South Africa* No. 62: 39.
(2) Magill & Van Rooy. 1998. *FSA* Bryophyta 1,3: 582, 583.

africana (Müll.Hal.) A.Jaeger
Perennial. Bryophyte, epiphyte. Length up to 400 mm. Alt 50–2050 m. LIM, M, S, KZN, WC, EC

PILOTRICHELLA (Müll.Hal.) Besch. 9765600
(1) Van Rooy. 1993. In Arnold & De Wet, *Memoirs of the Botanical Survey of South Africa* No. 62: 39.
(2) Magill & Van Rooy. 1998. *FSA* Bryophyta 1,3: 575–578.

pandurifolia (Müll.Hal.) A.Jaeger
Perennial. Bryophyte, occ. epiphyte. Length 20–150 mm. Alt 50–1800 m. LIM, M, S, KZN, EC

SQUAMIDIUM (Müll.Hal.) Broth. 9765700
(1) Van Rooy. 1993. In Arnold & De Wet, *Memoirs of the Botanical Survey of South Africa* No. 62: 39.
(2) Magill & Van Rooy. 1998. *FSA* Bryophyta 1,3: 578, 579.

biforme (Hampe) Broth. = **S. brasiliense**

brasiliense (Hornsch.) Broth.
S. biforme (Hampe) Broth. (2)
Perennial. Bryophyte, epiphyte. Length up to 200 mm. Alt 100–2120 m. LIM, NW, M, S, KZN, WC, EC

TRACHYPODOPSIS M.Fleisch. 9763700
(1) Van Rooy. 1993. In Arnold & De Wet, *Memoirs of the Botanical Survey of South Africa* No. 62: 38.
(2) Magill & Van Rooy. 1998. *FSA* Bryophyta 1,3: 560–564.
(3) Buck & Goffinet. 2000. In Shaw & Goffinet, *Bryophyte biology*: 112.

serrulata (P.Beauv.) M.Fleisch.
Perennial. Bryophyte, epiphyte. Length 20–100 mm. Alt 1050–1970 m. M

TRACHYPUS Reinw. & Hornsch. 9763800
(1) Van Rooy. 1993. In Arnold & De Wet, *Memoirs of the Botanical Survey of South Africa* No. 62: 38.
(2) Magill & Van Rooy. 1998. *FSA* Bryophyta 1,3: 560–564.
(3) Buck & Goffinet. 2000. In Shaw & Goffinet, *Bryophyte biology*: 112.

bicolor Reinw. & Hornsch. var. **viridulus** (Mitt.) Zanten
Perennial. Bryophyte, occ. epiphyte. Length up to 50 mm. Alt 300–1640 m. M, KZN

MNIACEAE
Compiled by J. van Rooy

MIELICHHOFERIA Nees & Hornsch. 9750500
(1) Magill. 1987. *FSA* Bryophyta 1,2: 338–341.
(2) Van Rooy. 1993. In Arnold & De Wet, *Memoirs of the Botanical Survey of South Africa* No. 62: 32.
(3) Buck & Goffinet. 2000. In Shaw & Goffinet, *Bryophyte biology*: 105.

bryoides (Harv.) Wijk & Margad.
Perennial. Bryophyte. Ht 2–10 mm. Alt 150–3200 m. LIM, NW, G, M, FS, KZN, L, WC, EC

subnuda Sim
Perennial. Bryophyte. Ht 2–5 mm. Alt 750–2600 m. FS, KZN, L, EC

PLAGIOMNIUM T.J.Kop. 9752200
(1) Magill. 1987. *FSA* Bryophyta 1,2: 395–397.
(2) Van Rooy. 1993. In Arnold & De Wet, *Memoirs of the Botanical Survey of South Africa* No. 62: 33.

rhynchophorum (Hook.) T.J.Kop. var. **reidii** (Dixon) T.J.Kop.
Perennial. Bryophyte. Length up to 40 mm. Alt 50–3000 m. M, FS, KZN, L, WC, EC

POHLIA Hedw. 9750900
(1) Magill. 1987. *FSA* Bryophyta 1,2: 349–354.
(2) Van Rooy. 1993. In Arnold & De Wet, *Memoirs of the Botanical Survey of South Africa* No. 62: 32.
(3) Arts. 1995. *Journal of Bryology* 18: 791–796.
(4) Buck & Goffinet. 2000. In Shaw & Goffinet, *Bryophyte biology*: 105.

baronii Wijk & Margad.
Perennial. Bryophyte. Ht 5–20 mm. Alt 1075–3200 m. LIM, G, M, KZN, L

cruda (Hedw.) Lindb.
Perennial. Bryophyte. Ht 5–30 mm. Alt 2425–3270 m. KZN, L

elongata Hedw.
Perennial. Bryophyte. Ht 5–20 mm. Alt 450–3240 m. LIM, NW, G, M, FS, KZN, L, WC, EC

nutans (Hedw.) Lindb.
Perennial. Bryophyte. Ht 10–30 mm. Alt ± 750–1680 m. WC, EC

MYRINIACEAE
Compiled by J. van Rooy

HELICODONTIUM (Mitt.) A.Jaeger 9769800
(1) Sim. 1926. *The bryophyta of South Africa*: 366.
(2) Magill & Schelpe. 1979. *Memoirs of the Botanical Survey of South Africa* No. 43: 19.
(3) Van Rooy. 1993. In Arnold & De Wet, *Memoirs of the Botanical Survey of South Africa* No. 62: 41.
(4) Buck & Goffinet. 2000. In Shaw & Goffinet, *Bryophyte biology*: 112.

lanceolatum (Hampe & Müll.Hal.) A.Jaeger
Perennial. Bryophyte, epiphyte. Length 25–75 mm. Alt 60–1200 m. M, KZN, WC, EC

NECKERACEAE
Compiled by J. van Rooy

NECKERA Hedw. 9766800
(1) Van Rooy. 1993. In Arnold & De Wet, *Memoirs of the Botanical Survey of South Africa* No. 62: 39.
(2) Magill & Van Rooy. 1998. *FSA* Bryophyta 1,3: 590, 591.
(3) Matcham & Duckett. 2003. *Tropical Bryology* 24: 6.

valentiniana Besch.
Perennial. Bryophyte, epiphyte. Length 40–60 mm. Alt 20–2000 m. LIM, NW, M, KZN, L, WC, EC

PINNATELLA M.Fleisch. 9767300
(1) Van Rooy. 1993. In Arnold & De Wet, *Memoirs of the Botanical Survey of South Africa* No. 62: 39.
(2) Enroth. 1994. *Acta Botanica Fennica* 151: 32–37.

capense Hornsch.
Perennial. Bryophyte, hydrophyte. Length 40–220 mm. Alt 90–2450 m. LIM, M, KZN, WC, EC

fimbriatum Wilson
Perennial. Bryophyte, hydrophyte. Length 80–120 mm. Alt ± 1850 m. M

perichaetiale Hampe
Perennial. Bryophyte, hydrophyte. Length 80–140 mm. Alt up to 600 m. KZN, WC, EC

pycnocladulum Müll.Hal.
Perennial. Bryophyte, hydrophyte. Length 50–200 mm. Alt ± 600–950 m. WC, EC

strictum Sull. subsp. **pappeanum** (Müll.Hal.) A.Eddy
Perennial. Bryophyte, hydrophyte. Length 60–180 mm. Alt 550–2100 m. M, KZN, WC, EC

truncatum Hornsch.
Perennial. Bryophyte, hydrophyte. Length 35–110 mm. Alt up to 2150 m. LIM, NW, G, M, S, KZN, WC, EC

violascens Müll.Hal.
Perennial. Bryophyte, hydrophyte. Length up to 60 mm. Alt ± 50–750 m. WC

SPLACHNACEAE

ACHARIACEAE

Compiled by R.H. Archer & C.L. Bredenkamp

Note: Phylogenetic relationships within the Flacourtiaceae, Salicaceae and Achariaceae have been reassessed with *rbcl*, *trnL-F* and *ndhF* DNA sequences and several groups have been identified. The first group retains the family name Salicaceae as the name has nomenclatural priority, and the second group has the conserved name Achariaceae (Soltis *et al.* 2000, in *Botanical Journal of the Linnean Society* 133: 381–461; Chase *et al.* 2002, in *Kew Bulletin* 57: 141–181).

Gomphocarpus meyerianus Schltr. (2)
Lagarinthus revolutus E.Mey. var. *minor* E.Mey. (2)
Perennial. Geophytic herb. Ht 100–260 mm. Alt 800–1500 m. NW, G, S, FS, KZN, L?, NC, EC

microphylla Roth = **Pentatropis capensis**

microphylla Roxb., naked name = **Pentatropis capensis**

E **monticola** N.E.Br.
Perennial. Geophytic herb. Ht 50–130 mm. Alt ± 2000 m. EC

mucronata Thunb. = **Woodia mucronata**

multicaulis (E.Mey.) Schltr.
A. depressa (Schltr.) Schltr. (12)
Gomphocarpus depressus Schltr. (12)
Gomphocarpus multicaulis (E.Mey.) D.Dietr. (2)
Lagarinthus multicaulis E.Mey. (2)
Perennial. Geophytic herb. Ht 80–150 mm. Alt 1200–2200 m. G, M, FS, KZN, L, EC

E? **multiflora** (Decne.) N.E.Br. (insufficiently known)
Gomphocarpus multiflorus Decne. (1)
Perennial. Herb. Ht? Alt? Distr.?

E **nana** I.Verd.
Perennial. Geophytic herb. Ht ± 110 mm. Alt ± 1360 m. LIM

E **navicularis** (E.Mey.) Schltr.
Gomphocarpus navicularis (E.Mey.) D.Dietr. (2)
Lagarinthus navicularis E.Mey. (2)
Perennial. Geophytic herb. Ht 105–290 mm. Alt 20–900 m. EC

navicularis (E.Mey.) Schltr. var. *compressidens* N.E.Br. = **A. compressidens**

nivea L. var. *curassavica* (L.) Kuntze = **A. curassavica**

nuda Schumach. & Thonn. = **Sarcostemma viminale** subsp. **viminale**

nutans (Klotzsch) N.E.Br. = **Gomphocarpus tomentosus** subsp. **tomentosus**

ochroleuca (Schltr.) Schltr. = **Xysmalobium gerrardii**

orbicularis (E.Mey.) Schltr. = **Xysmalobium orbiculare**

oreophila Nicholas
Perennial. Geophytic herb. Ht 70–230 mm. Alt 1700–3000 m. KZN, L, EC

oxytropis (Turcz.) Schltr. = **A. gibba** var. **gibba**

pachyglossa (Schltr.) Schltr. = **Xysmalobium parviflorum**

pachystephana Schltr. = **Schizoglossum linifolium** var. **linifolium**

E **patens** N.E.Br.
Perennial. Geophytic herb. Ht 200–840 mm. Alt 150–360 m. EC

E **peltigera** (E.Mey.) Schltr.
A. truncata Harv., not of D.Dietr. (2)
Gomphocarpus peltigerus (E.Mey.) D.Dietr. (2)
Lagarinthus peltigerus E.Mey. (2)
Perennial. Geophytic herb. Ht 310–820 mm. Alt 30–100 m. EC

physocarpa (E.Mey.) Schltr. = **Gomphocarpus physocarpus**

E **praemorsa** Schltr.
Gomphocarpus truncatus (E.Mey.) D.Dietr. (2)
Gomphocarpus truncatus (E.Mey.) Harv. (2)
Lagarinthus truncatus E.Mey. (2)
Perennial. Geophytic herb. Ht 240–560(–780) mm. Alt 60–450 m. KZN, EC

procera Aiton = **Calotropis procera**

pubescens L. = **Gomphocarpus cancellatus**

E **rara** N.E.Br.
Perennial. Geophytic herb. Ht 90–200 mm. Alt ± 360 m. EC

rectinervis (Schltr.) Schltr. = **Xysmalobium confusum**

reenensis N.E.Br. = **Aspidonepsis reenensis**

reflectens (E.Mey.) Schltr. = **Pachycarpus reflectens**

rigidus (E.Mey.) Schltr. = **Pachycarpus rigidus**

rivalis S.Moore = **Kanahia laniflora**

rivularis (Schltr.) Schltr. = **Gomphocarpus rivularis**

rotundifolia Mill. = **Gomphocarpus cancellatus**

sabulosa Schltr. = **A. crispa** var. **crispa**

salicifolia Salisb. = **Gomphocarpus fruticosus** subsp. **fruticosus**

scabra (Harv.) Schltr. = **Pachycarpus scaber**

scabridifolia Schltr. = **Xysmalobium acerateoides**

schinzianus (Schltr.) Schltr. = **Pachycarpus schinzianus**

schlechteri (K.Schum.) N.E.Br.
Gomphocarpus schlechteri K.Schum. (2)
Perennial. Geophytic herb. Ht 535–550 mm. Alt ± 800 m. S, KZN

simplex (Schltr.) Schltr. = **A. stellifera**

sinuosa Burm.f. = **A. crispa** var. **crispa**

stellifera Schltr.
A. simplex (Schltr.) Schltr. (2)
Gomphocarpus revolutus (E.Mey.) D.Dietr. (2)

Gomphocarpus simplex Schltr. (2)
Lagarinthus revolutus E.Mey. (2)
Perennial. Geophytic herb. Ht 120–290 mm. Alt 1000–2100 m. LIM, NW, G, M, S, FS, KZN, L, EC

stockenstromensis (Scott-Elliot) Schltr. = **Xysmalobium stockenstromense**

suaveolens Schltr. = **Pachycarpus suaveolens**

sulphurea in sense of Schltr. = **Xysmalobium gerrardii**

sulphurea in sense of S.Moore = **Xysmalobium asperum**

tenuis (E.Mey.) Schltr. = **Schizoglossum linifolium** var. **linifolium**

transvaalensis (Schltr.) Schltr. = **Pachycarpus transvaalensis**

truncata Harv., not of D.Dietr. = **A. peltigera**

tysoniana Schltr. = **Xysmalobium tysonianum**

E **ulophylla** Schltr.
Perennial. Geophytic herb. Ht ± 820 mm. Alt ± 330 m. M

undulata L. (1753) = **Xysmalobium undulatum**

undulata L. (1769), not of L. (1753) = **A. crispa** var. **crispa**

valida (Schltr.) Schltr. = **Pachycarpus asperifolius**

E **velutina** (Schltr.) Schltr.
Gomphocarpus velutinus Schltr. (2)
Perennial. Geophytic herb. Ht 75–114 mm. Alt 900–1200 m. M

vexillare (E.Mey.) Schltr. = **Pachycarpus vexillaris**

E **vicaria** N.E.Br.
Perennial. Geophytic herb. Ht 200–300 mm. Alt 1300–2000 m. M, KZN, EC

villosa Mill. = **Gomphocarpus tomentosus** var. **tomentosus**

viridiflora (E.Mey.) Goyder, illegitimate name = **A. dregeana** var. **dregeana**

E **woodii** (Schltr.) Schltr.
Gomphocarpus woodii Schltr. (2)
Perennial. Geophytic herb. Ht 380–800 mm. Alt 600–1400 m. KZN

xysmalobioides Hilliard & B.L.Burtt, not of S.Moore
Perennial. Geophytic herb. Ht 170–200 mm. Alt 1800–2500 m. KZN, L

ASPIDOGLOSSUM E.Mey. 6778010

(1) Bruyns. 1999. *Botanical Journal of the Linnean Society* 131: 383–398.

E**arcuata** (N.E.Br.) Bruyns subsp. **arcuata**
Pectinaria arcuata N.E.Br. (1)
Perennial. Creeping succulent. Ht 5–20 mm. Alt 400–750 m. EC

E**arcuata** (N.E.Br.) Bruyns subsp. **mirkinii** (Pillans) Bruyns
O. arcuata (N.E.Br.) Bruyns var. *mirkinii* (Pillans) Bruyns (1)
Pectinaria mirkinii Pillans (1)
Perennial. Creeping succulent. Ht 5–20 mm. Alt 400–750 m. EC

arcuata (N.E.Br.) Bruyns var. *mirkinii* (Pillans) Bruyns = **Ø. arcuata** subsp. **mirkinii**

E**willowmorensis** Bruyns
Perennial. Creeping succulent. Ht 5–20 mm. Alt 1000–1300 m. EC

ORBEA Haw. 6885050
(1) Leach. 1978. *Excelsa Taxonomic Series* 1: 1–74.
(2) Bruyns. 2002. *Systematic Botany Monographs* 63: 1–190.
(3) Plowes. 2004. *Asklepios* 90: 14–17.

E**carnosa** (Stent) Bruyns subsp. **carnosa**
Caralluma carnosa Stent (2)
Pachycymbium carnosum (Stent) L.C.Leach (2)
Perennial. Succulent. Ht 40–150 mm. Alt 1000–1400 m. LIM, NW

carnosa (Stent) Bruyns subsp. **keithii** (R.A.Dyer) Bruyns
Caralluma fosteri Pillans (2)
Caralluma keithii R.A.Dyer (2)
Caralluma schweickerdtii Oberm. (2)
Pachycymbium keithii (R.A.Dyer) L.C.Leach (2)
Pachycymbium lancasteri Lavranos (2)
Perennial. Succulent. Ht 40–150 mm. Alt 300–1200 m. B, LIM, M, S, KZN

E**ciliata** (Thunb.) L.C.Leach
Diplocyatha ciliata (Thunb.) N.E.Br. (2)
Stapelia ciliata Thunb. (2)
Perennial. Succulent. Ht 40–120 mm. Alt 600–1200 m. NC, WC

E**conjuncta** (A.C.White & B.Sloane) Bruyns
Orbeanthus conjunctus (A.C.White & B.Sloane) L.C.Leach (2)
Stultitia conjuncta A.C.White & B.Sloane (2)
Perennial. Creeping succulent. Length 50–200 mm. Alt 900–1600 m. LIM

cooperi (N.E.Br.) L.C.Leach
Stapelia cooperi N.E.Br. (2)
Stapeliopsis cooperi (N.E.Br.) E.Phillips, illegitimate name (2)
Stultitia cooperi (N.E.Br.) E.Phillips (2)
Perennial. Succulent. Ht 20–60 mm. Alt 900–1500 m. NW, FS, EC, NC

E**elegans** Plowes (3)
Perennial. Succulent. Ht up to 70 mm. Alt ± 1150 m. LIM

E**gerstneri** (Letty) Bruyns subsp. **elongata** (R.A.Dyer) Bruyns
Caralluma gerstneri Letty subsp. *elongata* R.A.Dyer (2)
Orbeopsis gerstneri (Letty) L.C.Leach subsp. *elongata* (R.A.Dyer) L.C.Leach (2)
Perennial. Succulent. Ht 30–100 mm. Alt 900–1600 m. LIM, M

gerstneri (Letty) Bruyns subsp. **gerstneri**
Caralluma gerstneri Letty (2)
Orbeopsis gerstneri (Letty) L.C.Leach subsp. *gerstneri* (2)
Perennial. Succulent. Ht 30–70 mm. Alt 250–700 m. S, KZN

E**hardyi** (R.A.Dyer) Bruyns
Orbeanthus hardyi (R.A.Dyer) L.C.Leach (2)
Stultitia hardyi R.A.Dyer (2)
Perennial. Creeping succulent. Length 30–300 mm. Alt 900–1500 m. LIM, M

irrorata (Masson) L.C.Leach = **O. verrucosa**

knobelii (E.Phillips) Bruyns
Caralluma kalaharica Nel in A.C.White & B.Sloane (2)
Caralluma knobelii (E.Phillips) E.Phillips (2)
Caralluma langii A.C.White & B.Sloane (2)
Orbeopsis knobelii (E.Phillips) L.C.Leach (2)
Stapelia knobelii E.Phillips (2)
Perennial. Succulent. Ht 30–100 mm. Alt 900–1100 m. B, NW, NC

longidens (N.E.Br.) L.C.Leach
Stapelia longidens N.E.Br. (2)
Perennial. Succulent. Ht 50–120 mm. Alt 10–100 m. KZN

lugardii (N.E.Br.) Bruyns
Angolluma lugardii (N.E.Br.) Plowes (2)
Caralluma longicuspis N.E.Br. (2)
Caralluma lugardii N.E.Br. (2)
Pachycymbium lugardii (N.E.Br.) M.G.Gilbert (2)
Perennial. Succulent. Ht 0.04–0.15 m. Alt 600–1700 m. N, B, LIM, NW, NC

lutea (N.E.Br.) Bruyns subsp. **lutea**
Caralluma lateritia N.E.Br. (2)
Caralluma lutea N.E.Br. (2)
Caralluma lutea N.E.Br. var. *lateritia* (N.E.Br.) Nel (2)
Caralluma vansonii Bremek. & Oberm. (2)
Orbeopsis lutea (N.E.Br.) L.C.Leach subsp. *lutea* (2)
Perennial. Succulent. Ht 30–120 mm. Alt 500–1500 m. B, LIM, NW, G, FS, NC

lutea (N.E.Br.) Bruyns subsp. **vaga** (N.E.Br.) Bruyns
Caralluma lutea N.E.Br. subsp. *vaga* (N.E.Br.) L.C.Leach (2)
Caralluma nebrownii A.Berger (2)
Caralluma nebrownii A.Berger var. *discolor* Nel (2)
Caralluma nebrownii A.Berger var. *pseudonebrownii* (Dinter) A.C.White & B.Sloane (2)
Caralluma pseudonebrownii Dinter (2)
Caralluma vaga (N.E.Br.) A.C.White & B.Sloane (2)
Orbeopsis lutea (N.E.Br.) L.C.Leach subsp. *vaga* (N.E.Br.) L.C.Leach (2)
Stapelia vaga N.E.Br. (2)
Perennial. Succulent. Ht 30–120 mm. Alt 800–1700 m. N, NC

E**macloughlinii** (I.Verd.) L.C.Leach
O. speciosa L.C. Leach (2)
Stapelia macloughlinii I.Verd. (2)
Perennial. Succulent. Ht 40–100 mm. Alt 500–700 m. KZN, EC

maculata (N.E.Br.) L.C.Leach subsp. **maculata**
Caralluma grandidens I.Verd. (2)

Caralluma maculata N.E.Br. (2)
Perennial. Succulent. Ht 40–100 mm. Alt 300–1200 m. B, LIM, M, KZN

melanantha (Schltr.) Bruyns
Caralluma leendertziae N.E.Br. (2)
Caralluma melanantha (Schltr.) N.E.Br. (2)
Caralluma rubiginosa Werderm. (2)
Orbeopsis melanantha (Schltr.) L.C.Leach (2)
Stapelia furcata N.E.Br. (2)
Stapelia melanantha Schltr. (2)
Perennial. Succulent. Ht 30–100 mm. Alt 1000–1700 m. LIM, G, M

E **miscella** (N.E.Br.) Meve
Angolluma miscella (N.E.Br.) Plowes (2)
Caralluma bredae R.A.Dyer var. *bredae* (2)
Caralluma bredae R.A.Dyer var. *thomallae* R.A.Dyer (2)
Pachycymbium miscellum (N.E.Br.) M.G.Gilbert (2)
Stapelia miscella N.E.Br. (2)
Stultitia miscella (N.E.Br.) C.A.Lückh. (2)
Perennial. Dwarf succulent. Ht 10–70 mm. Alt 500–1500 m. NC, WC, EC

E **namaquensis** (N.E.Br.) L.C.Leach
Stapelia namaquensis N.E.Br. (2)
Stapelia tridentata (N.E.Br.) Rüst (2)
Perennial. Succulent. Ht 30–100 mm. Alt 200–1500 m. NC

E? **namaquensis** (N.E.Br.) L.C.Leach × **Stapelia hirsuta** L.
Stapelia barklyi N.E.Br. (2)
Perennial. Succulent. Ht? Alt? NC

paradoxa (I.Verd.) L.C.Leach
Stultitia paradoxa I.Verd. (2)
Perennial. Succulent. Ht 30–60 mm. Alt 20–300 m. M, S, KZN

E **pulchella** (Masson) L.C.Leach
Stapelia pulchella Masson (2)
Perennial. Succulent. Ht 25–100 mm. Alt 20–400 m. EC

rogersii (L.Bolus) Bruyns
Angolluma rogersii (L.Bolus) Plowes (2)
Caralluma rogersii (L.Bolus) E.A.Bruce & R.A.Dyer (2)
Pachycymbium rogersii (L.Bolus) M.G.Gilbert (2)
Stapelia rogersii L.Bolus (2)
Perennial. Succulent. Ht 30–100 mm. Alt 500–1200 m. B, LIM, M, KZN

speciosa L.C.Leach = **O. macloughlinii**

tapscottii (I.Verd.) L.C.Leach
Stapelia tapscottii I.Verd. (2)
Stultitia tapscottii (I.Verd.) E.Phillips (2)
Perennial. Succulent. Ht 50–120 mm. Alt 1000–1500 m. B, LIM, NW, G, M

ubomboensis (I.Verd.) Bruyns
Angolluma ubomboensis (I.Verd.) Plowes (2)
Caralluma ubomboensis I.Verd. (2)
Pachycymbium ubomboense (I.Verd.) M.G.Gilbert (2)
Perennial. Dwarf succulent. Ht 15–80 mm. Alt 300–1400 m. LIM, S, KZN

variegata (L.) Haw.
Stapelia lepida Jacq. (2)
Stapelia variegata L. (2)
Perennial. Succulent. Ht 25–100 mm. Alt 5–1000 m. WC, EC

E **verrucosa** (Masson) L.C.Leach
O. irrorata (Masson) L.C.Leach (2)
O. verrucosa (Masson) L.C.Leach var. *fucosa* (N.E.Br.) L.C.Leach (2)
O. verrucosa (Masson) L.C.Leach var. *verrucosa* (2)
Stapelia fucosa N.E.Br. (2)
Stapelia irrorata Masson (2)
Stapelia pulchra Schult. (2)
Stapelia verrucosa Masson (2)
Perennial. Succulent. Ht 25–100 mm. Alt 20–1700 m. WC, EC

verrucosa (Masson) L.C.Leach var. *fucosa* (N.E.Br.) L.C.Leach = **O. verrucosa**

verrucosa (Masson) L.C.Leach var. *verrucosa* = **O. verrucosa**

E **woodii** (N.E.Br.) L.C.Leach
Stapelia woodii N.E.Br. (2)
Stapelia woodii N.E.Br. var. *westii* R.A.Dyer (2)
Perennial. Succulent. Ht 40–60 mm. Alt 800–1200 m. KZN

ORBEANTHUS L.C.Leach 6885060

conjunctus (A.C.White & B.Sloane) L.C.Leach = **Orbea conjuncta**

hardyi (R.A.Dyer) L.C.Leach = **Orbea hardyi**

ORBEOPSIS L.C.Leach 6885070

gerstneri (Letty) L.C.Leach subsp. *elongata* (R.A.Dyer) L.C.Leach = **Orbea gerstneri** subsp. **elongata**

gerstneri (Letty) L.C.Leach subsp. *gerstneri* = **Orbea gerstneri** subsp. **gerstneri**

knobelii (E.Phillips) L.C.Leach = **Orbea knobelii**

lutea (N.E.Br.) L.C.Leach subsp. *lutea* = **Orbea lutea** subsp. **lutea**

lutea (N.E.Br.) L.C.Leach subsp. *vaga* (N.E.Br.) L.C.Leach = **Orbea lutea** subsp. **vaga**

melanantha (Schltr.) L.C.Leach = **Orbea melanantha**

ORTHANTHERA Wight 6862000
(1) Huber. 1967. *FSWA* 114: 46, 47.

browniana Schinz = **O. jasminiflora**

jasminiflora (Decne.) Schinz.
Barrowia jasminiflora Decne (1)
O. browniana Schinz (1)
Perennial. Creeper. Length up to 3 m. Alt 800–1500 m. N, B, LIM, NW, G, NC

PACHYCARPUS E.Mey. 6787010

albens E.Mey. = **Asclepias albens**

appendiculatus E.Mey.
Asclepias appendiculata (E.Mey.) Schltr. (5)
Gomphocarpus appendiculatus (E.Mey.) Decne. (5)
Gomphocarpus macroglossus Turcz. (5)
Xysmalobium appendiculatum (E.Mey.) D.Dietr. (5)
Perennial. Geophytic herb. Ht 0.25–0.5 m. Alt 140–1000 m. M, S, KZN, EC

asperifolius Meisn.

Asclepias valida (Schltr.) Schltr. (5)
Gomphocarpus asperifolius (Meisn.) Walp. (5)
Gomphocarpus validus Schltr. (5)
P. inconstans N.E.Br. (5)
P. validus (Schltr.) N.E.Br. (5)
Perennial. Geophytic herb. Ht 0.3–1.1 m. Alt 60–1700 m. LIM, G, M, S, KZN, EC

campanulatus (Harv.) N.E.Br. var. **campanulatus**
Gomphocarpus campanulatus Harv. (5)
Perennial. Geophytic herb. Ht 150–800 mm. Alt 1000–2075 m. S, KZN, EC

campanulatus (Harv.) N.E.Br. var. **sutherlandii** N.E.Br.
Asclepias gerrardii (Harv.) Schltr. (5)
Gomphocarpus gerrardii Harv. (5)
P. gerrardii (Harv.) N.E.Br. (5)
Schizoglossum gerrardii (Harv.) Benth. & Hook.f. (5)
Perennial. Geophytic herb. Ht 150–800 mm. Alt 1100–2100 m. LIM, G, M, S, FS, KZN, EC

concolor E.Mey.
Asclepias concolor (E.Mey.) Schltr. (5)
Asclepias geminiflora (Schltr.) Schltr. (5)
Gomphocarpus concolor (E.Mey.) Decne. (5)
Gomphocarpus geminiflorus Schltr. (5)
Xysmalobium concolor (E.Mey.) D.Dietr. (5)
Perennial. Geophytic herb. Ht 0.2–0.7(–1) m. Alt 10–1700 m. B, LIM, NW, G, M, S, KZN, EC

[E]coronarius E.Mey.
Gomphocarpus coronarius (E.Mey.) Decne. (5)
Xysmalobium coronarium (E.Mey.) D.Dietr. (5)
Perennial. Geophytic herb. Ht 0.5–0.7 m. Alt 100–500 m. KZN, EC

crispus (P.J.Bergius) E.Mey. = **Asclepias crispa** var. **crispa**

dealbatus E.Mey.
Asclepias alatus Schltr. (5)
Asclepias dealbata (E.Mey.) Schltr. (5)
Gomphocarpus alatus Schltr. (5)
Gomphocarpus dealbatus (E.Mey.) Decne. (5)
P. ligulatus E.Mey. (5)
Xysmalobium dealbatum (E.Mey.) D.Dietr. (5)
Xysmalobium ligulatum D.Dietr. (5)
Perennial. Geophytic herb. Ht 0.15–0.6 m. Alt 250–1600 m. KZN, L, WC, EC

decorus N.E.Br.
Perennial. Geophytic herb. Ht 0.2–0.5 m. Alt 450–1800 m. M, S, KZN

galpinii (Schltr.) N.E.Br.
Asclepias galpinii (Schltr.) Schltr. (5)
Gomphocarpus galpinii Schltr. (5)
Perennial. Geophytic herb. Ht 0.2–0.3 m. Alt 1220–1800 m. M, S

gerrardii (Harv.) N.E.Br. = **P. campanulatus** var. **sutherlandii**

VELLEREOPHYTON Hilliard & B.L.Burtt 8992010
Compiled by P.P.J. Herman

(1) Hilliard. 1983. *FSA* 33,7,2: 31–37.

dealbatum (Thunb.) Hilliard & B.L.Burtt
Gnaphalium candidissimum Lam., illegitimate name (1)
Gnaphalium carroënse Schrank. (1)
Gnaphalium dealbatum Thunb. (1)
Gnaphalium maculatum Thunb. (1)
Gnaphalium micranthum Thunb. (1)
Perennial. Herb, prostrate to weakly erect. Length 0.03–0.45 m. Alt 0–750 m. NC, WC, EC

E **felinum** Hilliard
Perennial. Herb, decumbent. Length 0.05–0.15 m. Alt 1000–1220 m. WC

E **gracillimum** Hilliard
Annual. Herb, decumbent, then erect. Length 0.01–0.04 m. Alt 600–1000 m. NC, WC

E **lasianthum** (Schltr. & Moeser) Hilliard
Helichrysum lasianthum Schltr. & Moeser (1)
Annual? Herb, prostrate. Length up to 0.15 m. Alt 1500–2500 m. NC

E **niveum** Hilliard
Perennial. Herb, prostrate to weakly erect. Length 0.03–0.45 m. Alt 10–975 m. WC

E **pulvinatum** Hilliard
Perennial. Herb, prostrate. Length up to 0.05 m. Alt up to 500 m. WC

E **vellereum** (R.A.Dyer) Hilliard
Helichrysum vellereum R.A.Dyer (1)
Perennial. Herb, decumbent or ascending. Length up to 0.6 m. Alt 0–10 m. EC

Vauanthes dichotoma (L.) Kuntze (23)
Annual. Herb, succulent. Ht 0.05–0.25 m. Alt 50–1500 m. NC, WC

dielsii Schönland = **C. dentata**

diffusa Dryand. (insufficiently known) (23)

dinteri Schönland = **C. elegans** subsp. **elegans**

divaricata Eckl. & Zeyh. = **C. muricata**

divaricata in sense of Schönland & Baker f., not of Eckl. & Zeyh., misapplied name = **C. whiteheadii**

E dodii Schönland & Baker f.
Annual. Herb, succulent. Ht 0.01–0.05 m. Alt 100–600 m. WC

drakensbergensis Schönland = **C. vaginata** subsp. **vaginata**

dregeana Harv. = **C. obovata** var. **dregeana**

dregei (Harv.) Schönland = **C. pellucida** subsp. **brachypetala**

dubia Schönland = **C. cotyledonis**

ecklonii D.Dietr. = **C. depressa**

eendoornensis Dinter = **C. tomentosa** var. **glabrifolia**

elata N.E.Br. = **C. capitella** subsp. **nodulosa**

E elatinoides (Eckl. & Zeyh.) Friedrich
Bulliarda elatinoides Eckl. & Zeyh. (23)
Tillaea elatinoides (Eckl. & Zeyh.) Walp. (23)
Annual. Herb, succulent. Ht ± 0.06 m. Alt 1050–1085 m. WC

elegans Schönland & Baker f. = **C. elegans** subsp. **elegans**

elegans Schönland & Baker f. subsp. **elegans**
C. corpuscula riopsis Boom (23)
C. densa N.E.Br. (23)
C. dinteri Schönland (23)
C. elegans Schönland & Baker f. (23)
C. globosa N.E.Br. (23)
C. humilis N.E.Br. (23)
C. liquiritiodora Dinter (23)
C. mesembrianthoides Schönland & Baker f. (23)
C. schoenlandii H.Jacobsen (23)
Perennial. Herb, succulent. Ht ± 0.08 m. Alt 20–1800 m. N, NC

elongata Schönland = **C. pellucida** subsp. **brachypetala**

E elsieae Toelken
Perennial. Herb, succulent. Ht ± 0.1 m. Alt 1000–1500 m. WC

enantiophylla Baker f. = **C. capitella** subsp. **nodulosa**

engleri Schönland = **C. montana** subsp. **montana**

ericoides Haw. = **C. ericoides** subsp. **ericoides**

E ericoides Haw. subsp. **ericoides**
C. ericoides Haw. (23)
C. furcata (Eckl. & Zeyh.) Endl. ex Walp. (23)
C. jacobseniana Poelln. (23)
Tetraphyle furcata Eckl. & Zeyh. (23)
Perennial. Dwarf shrub, succulent. Ht 0.15–0.4 m. Alt 20–1000 m. KZN, WC, EC

E ericoides Haw. subsp. **tortuosa** Toelken
C. ericoides Haw. subsp. *tortuosa* Toelken, as '*torulosa*' (23)
Perennial. Dwarf shrub, succulent. Ht 0.15–0.4 m. Alt 800–1200 m. WC, EC

ericoides Haw. subsp. *tortuosa* Toelken, as '*torulosa*' = **C. ericoides** subsp. **tortuosa**

ernestii Schönland & Baker f. = **C. lanuginosa** var. **pachystemon**

erosula N.E.Br. in part = **C. subacaulis** subsp. **erosula**

exilis Harv. = **C. exilis** subsp. **exilis**

E exilis Harv. subsp. **cooperi** (Regel) Toelken
C. bolusii Hook. (23)
C. cooperi Regel (23)
C. picturata in sense of Boom, not of Friedrich (23)
Sedum regelii Kuntze (23)
Perennial, occ. annual. Herb, succulent. Ht ± 0.1 m. Alt 900–1500 m. EC

E exilis Harv. subsp. **exilis**
C. alpestris in sense of Drège, not of Thunb. (23)
C. exilis Harv. (23)
C. petraea Schönland (23)
Perennial, occ. annual. Herb, succulent. Ht ± 0.1 m. Alt 900–1100 m. NC

exilis Harv. subsp. **sedifolia** (N.E.Br.) Toelken
C. aurosensis Dinter (23)
C. cooperi in sense of Schönland, not of Regel (23)
C. picturata in sense of Friedrich, not of Boom, misapplied name (23)
C. sedifolia N.E.Br. (23)
Perennial, occ. annual. Herb, succulent. Ht ± 0.1 m. Alt 500–900 m. N, NC

exilis in sense of Keissl., not of Harv. = **C. setulosa** var. **rubra**

expansa Dryand. = **C. expansa** subsp. **expansa**

expansa Dryand. subsp. **expansa**
C. albicaulis Harv. (23)
C. expansa Dryand. (23)
C. parviflora E.Mey. ex Drège (23)
C. peploides in sense of Schönland, not of Harv. (23)
C. prostratum Thunb. (23)
Sedum expansum (Dryand. in Aiton) Kuntze (23)
Perennial. Herb, succulent. Ht ± 0.2 m. Alt 50–2000 m. LIM, NW, G, M, S, FS, KZN, NC, WC, EC

E expansa Dryand. subsp. **filicaulis** (Haw.) Toelken
C. filicaulis Haw. (23)
C. maritima Schönland (23)
C. uniflora Schönland (23)
Perennial. Herb, succulent. Ht ± 0.2 m. Alt 20–600 m. WC, EC

expansa Dryand. subsp. **fragilis** (Baker) Toelken
C. browniana Burtt Davy (23)
C. fragilis Baker (23)
C. furcata in sense of Schönland, not of (Eckl. & Zeyh.) Endl. & Walp., misapplied name (23)
C. thorncroftii Burtt Davy (23)
C. woodii Schönland (23)
Perennial, occ. annual. Herb, succulent. Ht ± 0.25 m. Alt 50–1800 m. LIM, G, M, S, KZN, EC

expansa Dryand. subsp. *peculiaris* Toelken = **C. peculiaris**

expansa Dryand. subsp. **pyrifolia** (Compton) Toelken
C. albicaulis in sense of Friedrich, not of Harv. (23)
C. pyrifolia Compton (23)
Perennial. Herb, succulent. Ht ± 0.4 m. Alt 50–500 m. N, NC, WC

falcata J.C.Wendl. = **C. perfoliata** var. **minor**

E**fallax** Friedrich
Curtogyne dejecta in sense of Eckl., not of (Jacq.) DC., misapplied name (23)
Perennial. Dwarf shrub, succulent. Ht ± 0.4 m. Alt 20–400 m. WC

fallax × **C. scabra**, putative hybrid (23)

falx Linding = **C. perfoliata** var. **minor**

E**fascicularis** Lam.
C. biconvexa Haw. (23)
C. capitata Lodd. (23)
C. media (Haw.) D.Dietr. (23)
C. odoratissima Andrews (23)
C. subulata in sense of P.J.Bergius; Thunb., not of L., misapplied name (23)
Dietrichia bicolor (Haw.) Eckl. & Zeyh. (23)
Dietrichia media (Haw.) Eckl. & Zeyh. (23)
Dietrichia odoratissima (Andrews) Tratt. ex Eckl. & Zeyh. (23)
Kalosanthes bicolor Haw. (23)
Kalosanthes biconvexa (Haw.) Haw. (23)
Kalosanthes capitata (Lodd.) Sweet (23)
Kalosanthes cymosa (P.J.Bergius) Haw. (23)
Kalosanthes fascicularis (Lam.) G.Don (23)
Kalosanthes media Haw. (23)
Kalosanthes odoratissima (Andrews) Haw. (23)
Kalosanthes odoratissima (Andrews) Haw. var. *alba* (DC.) G.Don (23)
Larochea cymosa (P.J.Bergius) Haw. in part (23)
Larochea fascicularis (Lam.) Schult. (23)
Larochea odoratissima (Andrews) Haw. (23)
Larochea odoratissima (Andrews) Haw. var. *bicolor* (Haw.) DC. (23)
Larochea tiniflora Lem. (23)
Rochea bicolor (Haw.) Steud. (23)
Rochea biconvexa (Haw.) DC. (23)
Rochea fascicularis (Lam.) DC. (23)
Rochea media (Haw.) DC. (23)
Rochea odoratissima (Andrews) Link (23)
Rochea odoratissima (Andrews) Link var. *alba* DC. (23)
Rochea odoratissima (Andrews) Link var. *bicolor* (Haw.) DC. (23)
Rochea subulata (L.) Adamson (23)
Rochea versicolor in sense of Harv. in part, not of (Ker Gawl.) Link, misapplied name (23)
Perennial. Dwarf shrub, succulent. Ht ± 0.4 m. Alt 50–1200 m. WC

fastigiata Schönland = **C. subulata** var. **fastigiata**

fergusoniae Schönland = **C. pubescens** subsp. **pubescens**

fergusoniae Schönland f. *major* Schönland = **C. pubescens** subsp. **pubescens**

filamentosa Schönland = **C. lanceolata** subsp. **lanceolata**

filicaulis Haw. = **C. expansa** subsp. **filicaulis**

E**filiformis** (Eckl. & Zeyh.) D.Dietr.
C. capillacea E.Mey. ex Drège, in part (23)
Dinacria filiformis (Eckl. & Zeyh.) Harv. (23)
Grammanthes filiformis Eckl. & Zeyh. (23)
Annual. Herb, succulent. Ht ± 0.1 m. Alt 20–200 m. WC, EC

flabellifolia Harv. = **C. umbella**

flagillima Dinter = **C. brevifolia** subsp. **brevifolia**

E**flanaganii** Schönland & Baker f.
C. acuminata E.Mey. ex Drège (23)
Perennial. Herb, succulent. Ht ± 0.2 m. Alt 50–900 m. KZN, EC

E**flava** L.
C. bullulata Haw. (23)
C. burmanniana (Eckl. & Zeyh.) D.Dietr. (23)
C. cymosa in sense of Thunb., not of P.J.Bergius (23)
C. virgata in sense of E.Mey. ex Drège, not of Harv., naked name (23)
Curtogyne burmanniana Eckl. & Zeyh. (23)
Curtogyne flava (L.) Eckl. & Zeyh. (23)
Kalosanthes flava (L.) Sweet (23)
Larochea flava (L.) Haw. (23)
Rochea flava (L.) DC. (23)
Sedum flavum (L.) Kuntze (23)
Sedum flavum (L.) Kuntze var. *brevifolium* Kuntze (23)
Sedum flavum (L.) Kuntze var. *lorifolium* Kuntze (23)
Perennial. Dwarf shrub, succulent. Ht ± 0.4 m. Alt 20–500 m. WC

flavovirens Pillans = **C. brevifolia** subsp. **brevifolia**

fragilis Baker = **C. expansa** subsp. **fragilis**

fragilis Schönland = **C. pubescens** subsp. **pubescens**

fruticulosa in sense of Harv., not of L., misapplied name = **C. biplanata**

fruticulosa in sense of Keissl., not of L. = **C. sarcocaulis** subsp. **rupicola**

fruticulosa L. (insufficiently known) (23)

furcata (Eckl. & Zeyh.) Endl. ex Walp. = **C. ericoides** subsp. **ericoides**

furcata in sense of Schönland, not of (Eckl. & Zeyh.) Endl. & Walp., misapplied name = **C. expansa** subsp. **fragilis**

fusca A.G.J.Herre
Perennial. Dwarf shrub, succulent. Ht ± 0.4 m. Alt 800–1090 m. N, NC

galpinii Schönland = **C. peploides**

garibina Marloth & Schönland = **C. garibina** subsp. **garibina**

garibina Marloth & Schönland subsp. **garibina**
C. garibina Marloth & Schönland (23)
Perennial. Dwarf shrub, succulent. Ht ± 0.25 m. Alt 500–800 m. N, NC

E**garibina** Marloth & Schönland subsp. **glabra** Toelken
Perennial. Dwarf shrub, succulent. Ht ± 0.25 m. Alt 900–1300 m. NC

gemmifera Friedrich
Perennial. Herb, succulent. Ht ± 0.07 m. Alt 1000–3200 m. FS, KZN, L, EC

gentianoides Lam. = **C. dichotoma**

gifbergensis Friedrich = **C. atropurpurea** var. **watermeyeri**

Perennial. Dwarf shrub, succulent. Ht 0.045–0.2 m. Alt 300–480 m. NC

[E]**cacalioides** (L.f.) Toelken
Cotyledon cacalioides L.f. (10)
Perennial. Shrub, succulent. Ht 0.3–1 m. Alt 300–1200 m. WC, EC

cacalioides (L.f.) Toelken × **T. paniculatus** (L.f.) Toelken, putative hybrid
Cotyledon fergusoniae L.Bolus (10)

E cordiformis G.Will.
Perennial. Dwarf succulent. Ht 0.005–0.03 m. Alt 400–600 m. NC

cremnophilus Bruyns = **T. ellaphieae**

E decipiens Toelken
Perennial. Dwarf shrub, succulent. Ht 0.05–0.2 m. Alt 300–480 m. NC

E ellaphieae Van Jaarsv.
T. cremnophilus Bruyns (14)
Perennial. Dwarf succulent. Ht 0.02–0.1 m. Alt 600–1200 m. NC

E faucium (Poelln.) Toelken
Cotyledon faucium Poelln. (10)
Perennial. Dwarf shrub, succulent. Ht 0.01–0.15 m. Alt 1100–1400 m. WC

E fragilis (R.A.Dyer) Toelken
Cotyledon fragilis R.A.Dyer (10)
Perennial. Dwarf succulent. Ht 0.01–0.2 m. Alt 5–20 m. WC

E grandiflorus (Burm.f.) Toelken
Cotyledon curviflora Sims (10)
Cotyledon grandiflora Burm.f. (10)
Cotyledon purpurea in sense of Haw., not of Thunb. (10)
Cotyledon tuberculosa Lam. (10)
Perennial. Dwarf shrub, succulent. Ht 0.15–0.5 m. Alt 50–300 m. WC, NC

hallii (Toelken) Toelken
Cotyledon hallii Toelken (10)
Cotyledon pearsonii Schönland in part (10)
Perennial. Dwarf shrub, succulent. Ht 0.15–0.3 m. Alt 300–800 m. N, NC

E hirtifolius (W.F.Barker) Toelken
Cotyledon hirtifolia W.F.Barker (10)
Perennial. Dwarf shrub, succulent. Ht 0.15–0.3 m. Alt 600–850 m. NC

E kritzingeri Van Jaarsv.
Perennial. Climber, succulent. Ht 0.2–1 m. Alt 500–1200 m. NC

E leucothrix (C.A.Sm.) Toelken
Adromischus leucothrix C.A.Sm. (10)
Cotyledon leucothrix (C.A.Sm.) Fourc. (10)
Cotyledon swartbergensis Poelln. (10)
Perennial. Dwarf shrub, succulent. Ht 0.1–0.3 m. Alt 400–700 m. WC, EC

E longipes Van Jaarsv. & G.Will.
Perennial. Dwarf succulent. Ht 0.02–0.2 m. Alt 400–800 m. NC

E mallei G.Will.
Perennial. Dwarf succulent. Ht 0.06–0.25 m. Alt 500–700 m. NC

E nigricaulis G.Will. & Van Jaarsv.
Perennial. Dwarf succulent. Ht 0.05–0.08 m. Alt 700–900 m. NC

E nolteei Lavranos
Perennial. Dwarf succulent. Ht 0.02–0.05 m. Alt 250–400 m. WC

E occultans (Toelken) Toelken
Cotyledon occultans Toelken (10)
Perennial. Dwarf geophyte, succulent. Ht 0.005–0.01 m. Alt 250–450 m. WC

paniculatus (L.f.) Toelken
Cotyledon fascicularis Aiton (10)
Cotyledon mollis Dinter (10)
Cotyledon paniculata L.f. (10)
Cotyledon spuria L. in part (10)
Cotyledon tardiflora Bonpl. (10)
Perennial. Shrub, succulent. Ht 0.5–2 m. Alt 50–1200 m. N, NC, WC, EC

papillaris (L.) G.D.Rowley (insufficiently known) (10)

pearsonii (Schönland) Toelken
Cotyledon luteosquamata Poelln. (10)
Cotyledon pearsonii Schönland in part (10)
Perennial. Dwarf shrub, succulent. Ht 0.05–0.15 m. Alt 300–1100 m. N, NC, WC

E peculiaris Van Jaarsv.
Perennial. Dwarf succulent. Ht 0.005–0.01 m. Alt 200–300 m. WC

E pusillus Bruyns
Perennial. Geophyte, succulent. Ht 0.005–0.01 m. Alt 600–950 m. NC

E pygmaeus (W.F.Barker) Toelken
Cotyledon pygmaea W.F.Barker (10)
Perennial. Dwarf succulent. Ht 0.025–0.15 m. Alt 150–300 m. WC

pygmaeus (W.F.Barker) Toelken var. *tenuis* (Toelken) Toelken = **T. tenuis**

racemosus (Harv.) Toelken
Cotyledon chloroleuca Dinter ex Friedrich (10)
Cotyledon racemosa Harv. in part (10)
Perennial. Dwarf shrub, succulent. Ht 0.1–0.4 m. Alt 200–1000 m. N, NC

reticulatus (L.f.) Toelken subsp. **phyllopodium** Toelken
Perennial. Dwarf shrub, succulent. Ht 0.1–0.3 m. Alt 50–700 m. N, NC

reticulatus (L.f.) Toelken subsp. **reticulatus**
Cotyledon dichotoma Haw. (10)
Cotyledon parvula Burch. (10)
Cotyledon reticulata L.f. (10)
Perennial. Shrub, dwarf shrub, succulent. Ht 0.05–0.4 m. Alt 20–1200 m. N, NC, WC, EC

rubrovenosus (Dinter) Toelken
Cotyledon rubrovenosa Dinter (10)
Perennial. Shrub, dwarf shrub, succulent. Ht 0.15–0.4 m. Alt 500–1200 m. N, NC

scandens Van Jaarsv. = **T. tenuis**

schaeferianus (Dinter) Toelken
Adromischus hoerleinianus (Dinter) Poelln. (10)

Adromischus keilhackii Werderm. (10)
Adromischus schaeferianus (Dinter) A.Berger (10)
Adromischus schaeferianus (Dinter) A.Berger var. *keilhackii* (Werderm.) Poelln. (10)
Cotyledon hoerleiniana Dinter (10)
Cotyledon hoerleiniana Dinter var. *schaeferi* Dinter (10)
Cotyledon schaeferi Dinter, naked name (10)
Cotyledon schaeferiana Dinter (10)
Cotyledon sinus-alexandri Poelln. (10)
Perennial. Geophyte, dwarf shrub, succulent. Ht 0.005–0.05 m. Alt 10–150 m. N, NC

similis (Toelken) Toelken
Cotyledon similis Toelken (10)
Perennial. Dwarf succulent. Ht 0.05–0.15 m. Alt 50–1100 m. N, NC

E stenocaulis Bruyns
Perennial. Dwarf succulent. Ht 0.05–0.15 m. Alt 600–800 m. WC

E striatus (Hutchison) Toelken
Cotyledon striata Hutchison (10)
Perennial. Dwarf shrub, succulent. Ht 0.15–0.3 m. Alt 200–1100 m. NC, WC

E suffultus Bruyns ex Toelken
Perennial. Dwarf scandent succulent. Ht 0.05–0.2 m. Alt 300–500 m. WC

E sulphureus (Toelken) Toelken var. **armianus** Van Jaarsv.
Perennial. Dwarf succulent. Ht 0.01–0.03 m. Alt 700–1100 m. NC

E sulphureus (Toelken) Toelken var. **sulphureus**
Cotyledon sulphurea Toelken (10)
Perennial. Dwarf succulent. Ht 0.01–0.03 m. Alt 700–1100 m. NC

E tenuis (Toelken) Bruyns
Cotyledon pygmaea W.F.Barker var. *tenuis* Toelken (16)
T. pygmaeus (W.F.Barker) Toelken var. *tenuis* (Toelken) Toelken (16)
T. scandens Van Jaarsv. (20)
Perennial. Dwarf succulent, scandent. Ht 0.05–0.2 m. Alt 100–300 m. WC

E torulosus Toelken
Perennial. Dwarf succulent. Ht 0.05–0.15 m. Alt 300–500 m. NC

E tribblei Van Jaarsv.
Perennial. Dwarf succulent, scandent. Ht 0.1–0.4 m. Alt 600–900 m. NC

E tuberosus Toelken
Perennial. Geophyte, succulent. Ht 0.04–0.35 m. Alt 900–1100 m. NC

E ventricosus (Burm.f.) Toelken
Cotyledon ventricosa Burm.f. (10)
Cotyledon ventricosa Burm.f. var. *alpina* Harv. (10)
Perennial. Shrub, dwarf shrub, succulent. Ht 0.05–0.3 m. Alt 50–1200 m. NC, WC, EC

E viridiflorus (Toelken) Toelken
Cotyledon viridiflora Toelken (10)
Perennial. Dwarf succulent. Ht 0.15–0.35 m. Alt 600–900 m. NC

wallichii (Harv.) Toelken subsp. **ecklonianus** (Harv.) Toelken
Cotyledon cacalioides in sense of Eckl. & Zeyh., not of Thunb. (10)
Cotyledon dinteri Baker f. (10)
Cotyledon eckloniana Harv. (10)
Perennial. Shrub, succulent. Ht 0.3–1 m. Alt 50–1200 m. N, NC

E wallichii (Harv.) Toelken subsp. **wallichii**
Cotyledon wallichii Harv. (10)
Perennial. Shrub, succulent. Ht 0.3–1 m. Alt 50–1500 m. NC, WC, EC

wallichii (Harv.) Toelken subsp. **wallichii** × **T. cacalioides** (L.f.) Toelken, putative hybrid (10)

Note 1: many of the varieties created and listed by Guthrie & Bolus and by Dulfer are not recognised at NBG but are retained here until their placement in synonymy, or elevation to specific or subspecific rank in some cases, has been formally published.

Note 2: altitudinal ranges for all species have been excluded because of the excessive time it would take to check thousands of specimens in NBG and BOL manually in order to give any meaningful figures.

E **abbottii** E.G.H.Oliv. (30)
Perennial. Dwarf shrub. Ht up to 0.2 m. KZN, EC

E **abelii** E.G.H.Oliv. (23)
Perennial. Dwarf shrub. Ht up to 0.6 m. EC

abietina in sense of Benth., not of L. = **E. patersonii**

E **abietina** L. subsp. **abietina**
E. abietina L. var. *abietina* (58)
E. coccinea P.J.Bergius (58)
Perennial. Shrub. Ht up to 1.5 m. WC

E **abietina** L. subsp. **atrorosea** E.G.H.Oliv. & I.M.Oliv.
E. hesseana Klotzsch (58)
E. phylicifolia Salisb. (58)
E. purpurea Andrews (58)
Perennial. Shrub. Ht up to 1.5 m. WC

E **abietina** L. subsp. **aurantiaca** E.G.H.Oliv. & I.M.Oliv.
E. exsurgens Andrews (58)
E. grandiflora L.f. var. *exsurgens* (Andrews) E.G.H.Oliv. (58)
E. grandiflora L.f. var. *grandiflora* (58)
Perennial. Shrub. Ht up to 1.5 m. WC

E **abietina** L. subsp. **constantiana** E.G.H.Oliv. & I.M.Oliv.
E. conica Lodd. (58)
Perennial. Shrub. Ht up to 0.5 m. WC

EUPHORBIACEAE
Compiled by R.H. Archer

Note: Phylogenetic relationships within the Euphorbiaceae have been reassessed with plastid and nuclear DNA sequences and several groups have been identified (e.g. APG II, 2003, *Botanical Journal of the Linnean Society* 141: 399–436; Chase *et al.* 2002, in *Kew Bulletin* 57: 141–181). The first group remains Euphorbiaceae. Phyllanthaceae (Wurdack *et al.* 2004, *American Journal of Botany* 91: 1882–1900; Samuel *et al.* 2005, *American Journal of Botany* 92: 132–141) have been segregated together with Picodendraceae (*Androstachys* & *Hyaenanche*) and Putranjivaceae (*Drypetes*) from Euphorbiaceae.
